Veterinary Endoscope

CLINICAL APPLICATIONS

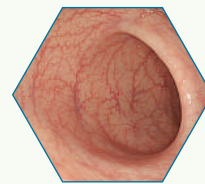

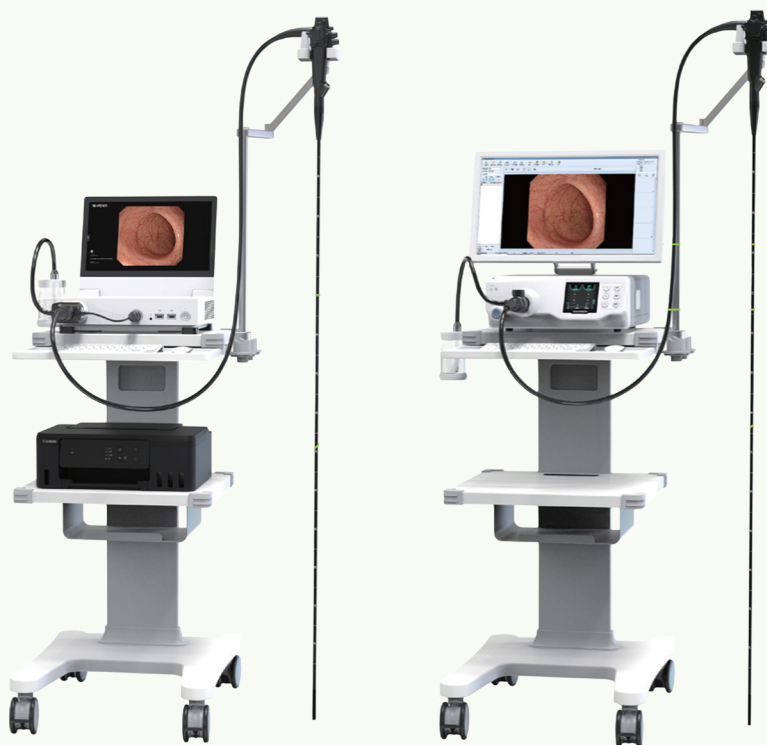

With a variety of specifications, suitable for animals from small to big, enabling precise examination and treatment of key areas like the stomach, colon, esophagus, uterus, respiratory tract, and ENT.

SPECIFICATIONS

Complete specifications, providing multiple choices. The outer diameter range of the insertion part is 2.8-11.5mm, and the working channel range is 1.2-3.2mm.

FEATURES

High Definition

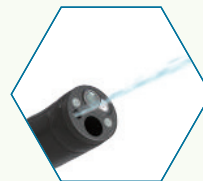

Wide Field Of View

Lightweight Handle

Slim Diameter With Large Channel

Water Jet

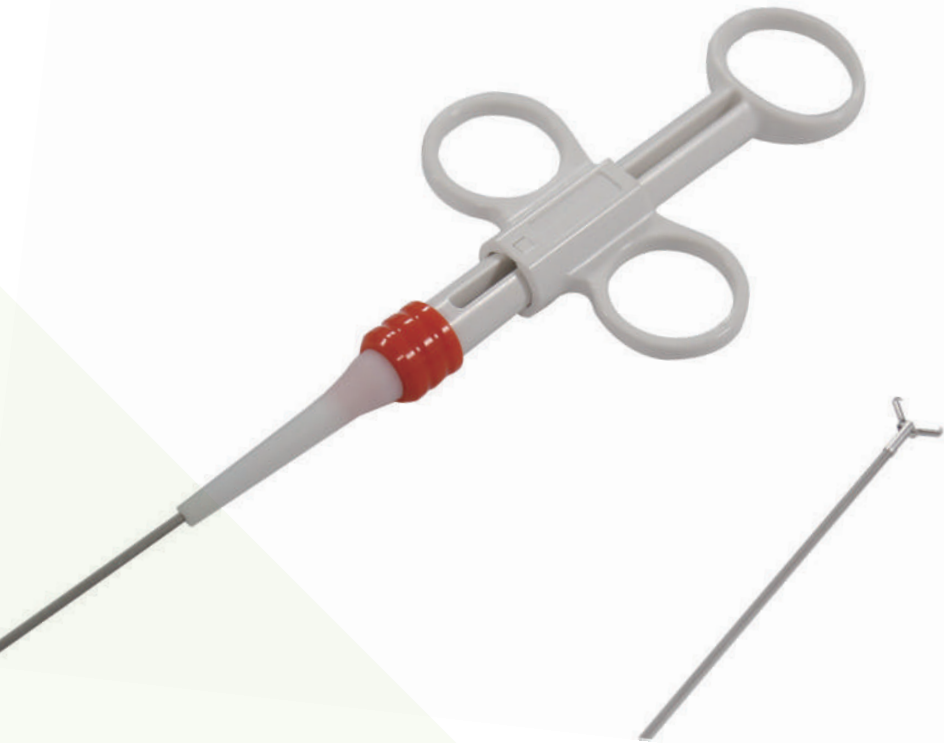

Multi-function Buttons

Grasping Forceps

SCOPE OF APPLICATION

Can be used in conjunction with bronchoscopy, gastroscopy, colonoscopy, laparoscopy, and ureters to grasp foreign bodies in the body.

PRODUCT FEATURES

- ◎ The opening and closing of the jaw head is flexible, which can accurately and firmly grasp foreign matters.
- ◎ The jaw head has enough opening width, which is suitable for the removal of irregular foreign bodies.

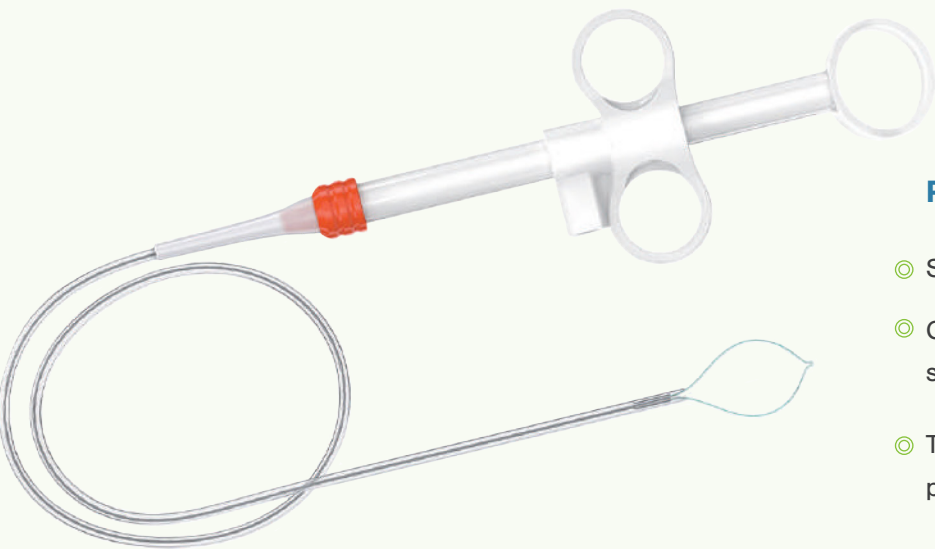

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Clamp Head Type
GM-GF-C-N-18-1200	1.8	≥2.0	1200	Rat tooth alligator
GM-GF-C-N-18-1800	1.8	≥2.0	1800	Rat tooth alligator
GM-GF-C-N-18-2300	1.8	≥2.0	2300	Rat tooth alligator
GM-GF-C-N-23-2300	2.3	≥2.8	2300	Rat tooth alligator
GM-GF-C-N-23-3500	2.3	≥2.8	3500	Rat tooth alligator

Mesh Shaped Foreign Body Forceps

SCOPE OF APPLICATION

Can be used in conjunction with bronchoscopy, gastroscopy, colonoscopy, laparoscopy, and ureters to grasp foreign bodies in the body.

PRODUCT FEATURES

- ⦿ Synchronous rotatable design.
- ⦿ Grasping foreign bodies precisely and substantially with net design.
- ⦿ Tough mesh materials applied, not easily pierced by sharp objects.

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Net Size (mm)	Type
GM-ER-18-1200-20	1.8	≥2.0	1200	20	Mesh Shaped
GM-ER-18-2300-20	1.8	≥2.0	2300	20	Mesh Shaped
GM-ER-25-2300-30	2.5	≥2.8	2300	30	Mesh Shaped
GM-ER-25-2300-40	2.5	≥2.8	2300	40	Mesh Shaped

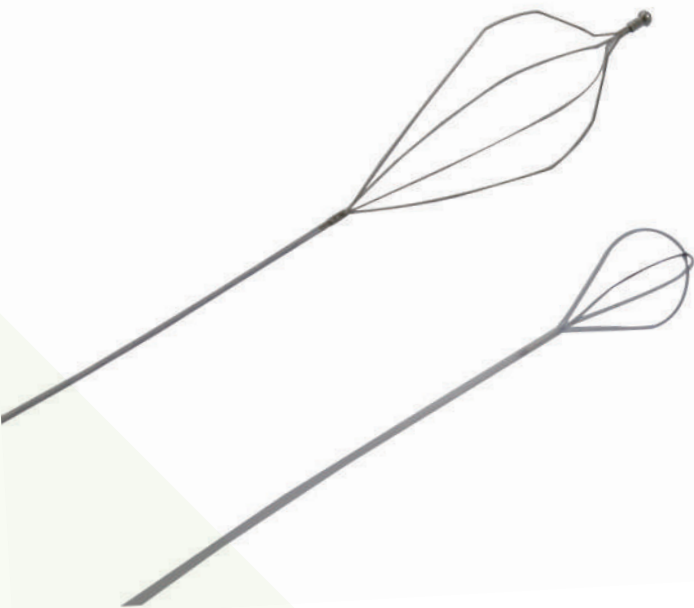

Basket Shaped Foreign Body Forceps

SCOPE OF APPLICATION

Can be used in conjunction with bronchoscopy, gastroscopy, colonoscopy, laparoscopy, and ureters to grasp foreign bodies in the body.

PRODUCT FEATURES

- ◎ The handle has a liquid injection port to facilitate the injection of contrast agent.
- ◎ The handle is ergonomically designed and can be operated with one hand.
- ◎ With high flexibility and flexible operation, it is conducive to the extraction and release of stones.
- ◎ The net wire has the proper hardness, it is not easy to scratch the tissue when taking the stone.
- ◎ A variety of headshape, can meet the clinical diverse needs.

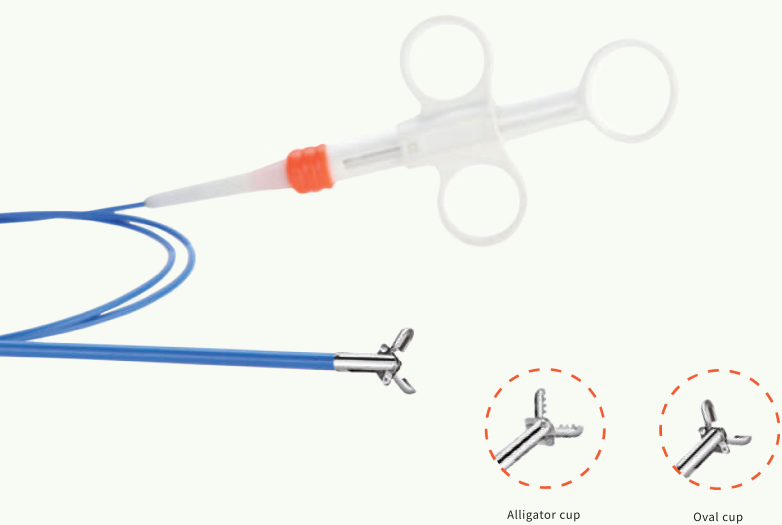

SPECIFICATIONS

Model	Maximum Width (mm)	Endoscopic Channel (mm)	Working Length (mm)	Opening Width (mm)	Features of Netse
GM-RB-E4NN-1524-18120	1.8	≥2.0	1200	15	Semi-circle Tipless
GM-RB-E4NN-1524-18180	1.8	≥2.0	1800	15	
GM-RB-E4NN-1524-18230	1.8	≥2.0	2300	15	
GM-RB-A4SN-2540-24230	2.4	≥2.6	2300	25	Four silk spiral

Biopsy Forceps

SCOPE OF APPLICATIONS

Can be used in conjunction with bronchoscopy, gastroscopy, colonoscopy and laparoscopy for live tissue sampling.

SPECIFICATIONS

PRODUCT FEATURES

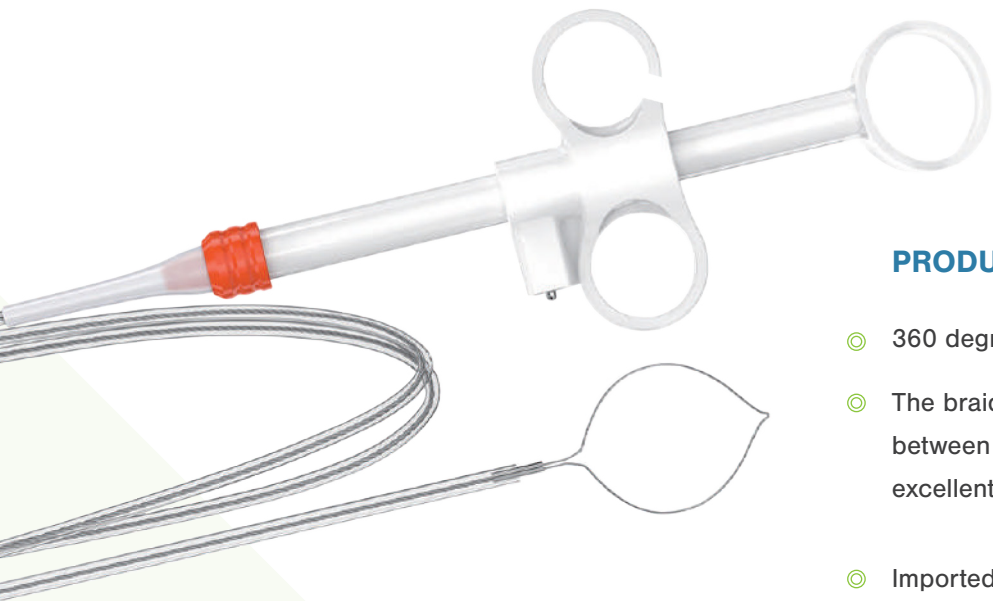

- Special sharpness treatment on jaws, proper sampling capacity without slipping.
- Fine polished cups without any sharp angle, effectively decrease the friction to the working channel.
- Laser welding tech, reliable links within each component.
- Excellent properties with high strength and stability.

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Jaw Type
GM-FB-A-N-10-1200	1.0	≥1.2	1200	Oval cup without needle
GM-FB-C-N-10-1200	1.0	≥1.2	1200	Rat tooth without needle
GM-FB-D-N-10-1200	1.0	≥1.2	1200	Alligator cup without needle
GM-FB-A-S-18-1200	1.8	≥2.0	1200	Oval cup without needle
GM-FB-C-S-18-1200	1.8	≥2.0	1200	Alligator cup without needle
GM-FB-A-S-18-2300	1.8	≥2.0	2300	Oval cup without needle
GM-FB-C-S-18-2300	1.8	≥2.0	2300	Alligator cup without needle
GM-FB-A-S-23-2300	2.3	≥2.8	2300	Oval cup without needle
GM-FB-C-S-23-2300	2.3	≥2.8	2300	Alligator cup without needle
GM-FB-A-S-23-3500	2.3	≥2.8	3500	Oval cup without needle
GM-FB-C-S-23-3500	2.3	≥2.8	3500	Alligator cup without needle
GM-FB-A-S-23-4000	2.3	≥2.8	4000	Oval cup without needle
GM-FB-C-S-23-4000	2.3	≥2.8	4000	Alligator cup without needle

Electric Polyp Snare

SCOPE OF APPLICATIONS

This product is connected to high-frequency equipment for removing polyps or extracting foreign objects from the body.

PRODUCT FEATURES

- 360 degree rotatable design, easy to operate.
- The braided steel wire increases the contact area between the steel wire and the tissue and has an excellent coagulation effect.
- Imported medical stainless steel guide wire, excellent electrification effort, uniform cutting.
- A variety of snare shapes to meet different clinical needs.

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Loop Opening (mm)	Trap Type
GM-SD-A-18-1200-15	1.8	≥2.0	1200	15	Oval
GM-SD-A-18-1200-20	1.8	≥2.0	1200	20	Oval
GM-SD-A-18-1600-20	1.8	≥2.0	1600	20	Oval
GM-SD-A-18-2300-25	1.8	≥2.0	2300	25	Oval
GM-SD-A-23-2300-25	2.3	≥2.8	2300	25	Oval

Cytology Brush

SCOPE OF APPLICATIONS

This product is used in conjunction with an endoscope for clinical brushing of cell samples.

PRODUCT FEATURES

- ◎ The bristles are arranged in an umbrella shape and sampled thoroughly.
- ◎ The straight brush has a circular head end effectively reducing irritation and damage to the innerwall of the cavity.
- ◎ The operation handle provides clear up and down guidance, which can effectively brush sample tissues.
- ◎ Sterile packaging, disposable, safe and convenient.

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Loop Opening (mm)	Brush Type
GM-BC-A-10-1000-20-10	1.0	≥1.2	1000	2.0	Straight shaped
GM-BC-A-10-1200-20-10	1.0	≥1.2	1200	2.0	Straight shaped
GM-BC-A-18-1200-20-10	1.8	≥2.0	1200	2.0	Straight shaped
GM-BC-A-18-1800-20-10	1.8	≥2.0	1800	2.0	Straight shaped
GM-BC-A-18-2300-20-10	1.8	≥2.0	2300	2.0	Straight shaped
GM-BC-A-18-2300-30-10	1.8	≥2.0	2300	3.0	Straight shaped

Clamp Device

SCOPE OF APPLICATIONS

Used in conjunction with an endoscope to place clips in the digestive tract. Clips are used for marking under the endoscope and hemostasis of digestive tissue.

PRODUCT FEATURES

- 360 ° bidirectional rotation control, repeatable opening and closing, offering a precise placement without misoperation.
- Excellent clamping strength to ensure the effectiveness of hemostasis and the firmness of suture.

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Opening Span (mm)
GM-HD-A-1950-09	2.5	≥2.8	1950	9
GM-HD-A-2300-09	2.5	≥2.8	2300	9

Injection Needle

SCOPE OF APPLICATIONS

During surgery, the procedure is performed under an endoscope to inject medication. Not used for administration to the circulatory system and central nervous system.

PRODUCT FEATURES

- Concealed needle design, effectively avoiding damages to the working channel.
- Excellent lubrication performance of outer tube, smoothly passing through the channel.
- Classic handle design, the injection points are clear.

SPECIFICATIONS

Model	O.D. (mm)	Endoscopic Channel (mm)	Working Length (mm)	Needle Length (mm)	Needle Model
GM-IN-B-23-2300-23-4	2.3	≥2.8	2300	4.0	23G
GM-IN-B-23-2300-23-5	2.3	≥2.8	2300	5.0	23G

Foreign Body Removal (FBR)

Rigid Graspers (Burchell Graspers)

SCOPE OF APPLICATIONS

Used in conjunction with an endoscope to remove foreign bodies

PRODUCT FEATURES

- Designed with Dr. Richard Burchell
- Rotatable Rat Tooth Grasper
- Handle Lock to ensure foreign body is secured
- Single Actuating Rat Tooth head to improve alignment with foreign body
- 10mm thick shaft to reduce flexing
- Available in 4 lengths
